Introduction

Wellness is an active process of becoming aware of and making choices toward a more successful existence.

It an integrated method of functioning which is oriented toward maximizing the potential of which the individual is capable. It requires that the individual maintain a continuum of balance and purposeful direction .

Wellness is a direction in progress toward an ever-higher potential of functioning.

In our complex world, how do we make choices? Do we make our current choices through the filters of our past experience? How can we make everybody happy including ourselves? What do we define as success? Can we live a Pain free life?

The choices that we make carry with them consequences. How can we ensure that each and every choice builds towards goals which are in the highest good? How can we tune into our higher wisdom and select the choices that lead to the outcomes that are in line with our highest good? This we call the **WISDOM WITHIN™**.

The Solution

We have designed a program which combines the very best of all available Western and Eastern Techniques and approaches that have been proven to be the most effective in helping individuals find and tune into their own **WISDOM WITHIN.™**

The program offers two(2) tracks, one for those interested in developing deeper skills in meditation and self realization and one for those healing from pain. Both maybe combined in one visit.

This 10-day program, which incorporates three days of silence, a vision quest and deep soul communication is designed to deepen the experience of Panchakarma.

Highlights of the week include Individual wellness assessment, Dosha, constitution, lifestyle, ailments etc assessment, individual selection of targeted Ayurvedic treatments a group excursion to the Sacred Hot Springs and Buddhist Temple, morning meditations with dolphins, evening satsangs (supportive group gathering involving Sanskrit chanting), and experiences that guide guests within so that they can hear the wisdom of their inner voice.

Guests will enjoy a deeper exploration of Ayurveda and the connection between physical experiences and spirituality in addition to daily CrainoSacral Therapy, Acupuncture and Ayurvedic spa treatments,
